

## 16<sup>th</sup> MicroMechanics Europe Workshop

## 20<sup>th</sup> Eurosensors Conference Anniversary

Göteborg, Sweden  
4th–6th September 2005

This two-day international workshop is a well-established and recognized European event in the fields of Micromachining, Microengineering and Technology for creating microsensors and microactuators. The annual MME workshop gathers scientists and people from academia and industry interested in these fields.

The goals are stimulation and improvement of know-how in the field, as well as the establishment of cooperation and friendship between delegates. Thus, MME is arranged so that people can meet in a friendly and informal atmosphere. Accordingly, the accent lies on mutual discussions around poster presentations rather than on formal oral presentations. In addition to this, five invited speakers will conduct a review on the state-of-the-art in several topics.

The workshop in Göteborg will be organised by Chalmers University of Technology in collaboration with IMEGO AB. With its relaxed and friendly atmosphere Göteborg proudly lives up to its reputation of having the charm of a small town with all the opportunities of a big city. MME 2005 will be held on 4<sup>th</sup>–6<sup>th</sup> September 2005 at the Chalmers Conference Centre, which is located on the premises of the Chalmers University of Technology near the city centre.

For more information about the workshop please visit our website at: <http://www.mc2.chalmers.se/mc2/conferences/MME05/>

Göteborg, Sweden  
17th–20th September 2006

Since its establishment in Cambridge in 1987 the Eurosensors series of conferences are the only European forum to cover the entire field of Sensors, Actuators and Microsystems. The 20<sup>th</sup> Eurosensors conference will follow the highly successful conferences held annually in various countries around Europe. The conference provides an excellent opportunity to bring together European scientists and engineers from academy, national research institutes and companies to present and discuss the latest results in the fields of solid-state sensors, actuators, microsystems and nanosystems.

Eurosensors attracts yearly more than 400 participants, mainly from Europe but also from all over the world. The 20<sup>th</sup> Eurosensors conference will be organised by Chalmers University of Technology in collaboration with The IMEGO Institute. Our application to host the Eurosensors conference was supported by our colleagues at Uppsala University, The Royal Institute of Technology, Lund University, Linköping University as well as partners from industry. The arrangement of the 20<sup>th</sup> Eurosensors conference in Göteborg offers a significant opportunity for Swedish academia and industry to gain exposure as well as to establish international contacts and collaboration.

The 20<sup>th</sup> Eurosensors conference anniversary will be held in Göteborg, the second largest city of Sweden, situated on the beautiful south west coast. The conference is to be held on 17<sup>th</sup>–20<sup>th</sup> September 2006 at the Chalmers Conference Centre.
